Section 1- General Information

1.1 - Product Description

Trimm, Inc.'s 2 level cable management bar kit is used with certain Trimm fuse panels to provide rails for cable/wiring securement.

1.2 - Inspection

Inspect the product for any noticeable defects, missing parts (See "What's Included" below), or shipping damage. Please retain the original packaging in case you need to return the product to Trimm, Inc. Please notify Trimm, Inc. if any problems are found at 1-800-298-7466. Products shall not be returned to Trimm, Inc. without the proper Return Material Authorization (RMA) number.

1.3 - What's Included

The unit should be packaged with the following items. Please notify Trimm, Inc. if any of these items are not included so a replacement can be sent out right away.

- 2 x cable management side brackets
- 2 x cable management rods
- 4 x flat head screws
- 4 x pan head screws w/internal lock washers.

Section 2 – Before You Begin

2.1 - Tools Required For Installation

The following tools may be needed to install this product.

- No. 2 Phillips head torque screw driver

Section 3 – Kit Installation

3.1 – Side Bracket Installation

Locate the 2 side brackets and 4 x pan head screws.

Attach a bracket using 2 screws to the holes in the fuse panel chassis as shown below. Torque screws to 7 in-lbs.
