◁ TRIMM, INC.

## FROGGING CLIP KIT
INSTALLATION GUIDE

Document INS-751013154X

This manual covers part numbers-
7510131540, 7510131541 and 7510131542

1.1 Product Description
The Trimm, Inc. "frogging clip" kits allow demarcation inputs on the 927 series of Demarcation Distribution Panels to be jumpered together to allow an individual pair of wires to feed 2 or 4 adjacent inputs. This eliminates having to run a separate pair of wires for each individual input.

1.2 Inspection
Inspect the clips for any noticeable defects, missing parts (See "What's Included" below), or shipping damage. Please retain the original packaging in case you need to return the product to Trimm, Inc. Please notify Trimm, Inc. if any problems are found at 1-800-298-7466. Products shall not be returned to Trimm, Inc. without the proper Return Material Authorization (RMA) number.

1.3 What's Included
The unit should be packaged with the following items. Please notify Trimm, Inc. if any of these items are not included so a replacement can be sent out right away.

- 1 set (1 battery and 1 return) of frogging clips
- Installation Guide

2.1 Installation
Attach the battery frogging clip over the adjacent "BAT" connection input terminals. (example input #1 and input #2) Secure 1 side of the frogging clip using the flat washers and locking nuts supplied with the distribution panel. Torque the nuts to 40 in-lbs. (4.5 Nm)
Repeat this process for the "RTN" connection of the matching inputs.

Warning: **Do not use frogging clips on any GMT fuse type inputs.**

(The image above shows typical 2U panel application—wire ready. Trimm part number 7510131540)

Repeat the process above for all applicable input connections. To continue panel installation, please refer to the installation guide that came with the power distribution unit.

(The image above shows typical 1U panel application—wire ready. Trimm part number 7510131541)
